

Multi-user screen sharing is now possible in Microsoft Teams

Frameable is a software company that aims to enhance remote collaboration within Microsoft products by offering tools to streamline teamwork from anywhere.

What we offer

Frameable MultiShare is the first and only way to share multiple screens simultaneously in a Microsoft Teams call. MultiShare enables users to maximize their in-meeting productivity through streamlined collaboration.

Users can enjoy uninterrupted screen sharing, spotlighting specific screens, toggling between different shared screens and more.

MultiShare supports up to 15 simultaneous screen shares so everyone can participate. Spotlight a screen to bring everyone's attention together without stopping any ongoing shares.

Why Frameable?

Do better work from anywhere

Easily troubleshoot a problem, present multiple scenarios with your colleagues and make decisions together in real-time.

Easily add to calls

Quickly add MultiShare to any call via the [+] button.

Technical support and security

Enterprise agreements come with a dedicated support manager.
